Twig Bench Now Made in USA

Personal Public Seats

Product Category Reorganization

If you've been to the Streetscapes, Inc. website lately, you've probably noticed that we've re-organized the product's landing page again. With more than 3,000 products for the public realm, we're trying to make product easier to find. We hope this helps. The revised categories [Bicycle Parking](#), [Deck and Gardens](#), [Golf Course Amenities](#) and [Green Roof Trays](#); [Parks and Recreation](#), [Passenger Amenities](#), [Pedestrian Amenities](#) and [Green Walls](#); [Plaza Seating](#), [Sidewalk Cafes](#) and [Sustainable Communities](#).

[outdoor fitness stations](#), [decorative bicycle rack](#) additions and [wayfinding signage](#).

Twig Bench and other now made in the USA.

The Twig Modular Bench – both [cast stone](#) and [HDPE Polymer](#) models, the Northlakes, Brisbane and University collection benches and SIT water fountains are now being made in the USA.

The Twig bench was designed to create different types of public seating using multiples of a single component. The Twig bench was inspired by a common streetscape element, the tree canopy and depending on your public space can be arranged to mimic that icon. It's versatile design can be configured to create both individual seating islands and group seating areas for conversations and discussion. Because of it's weight, it may also be used to create a sitting ledge.

The Low Density Polymer Twig model is lighter in weight than the cast stone version (700 lbs

Personal Public Seats

It seems natural that UrbaStyles [Personal Public Seats](#) should also be a part of this discussion. The Personal Public Seat comes in eleven distinctive styles and are made of cast stone. Manufactured in Belgium, they are a perfect compliment to the Street and Garden Furniture Twig Bench and other products from Escofet or Landscape Forms.

The Personal Public Seats are perfect for creating scattered individual seating area for individuals. They may be clustered to create group-seating areas or randomly placed as sidewalk or plaza elements. They're also great for public waiting areas since they offer 360° seating and viewing options. In the proper environment, they may also be used as low climbing objects for youngsters.
