THE MOLLYMOOK

BENCH OF THE MONTH

WHAT'S NEW

This month, we're featuring products designed to usher in spring and prepare us for the summer months ahead. As you focus on spring and summer projects, here's some food for thought. **Planters 1** are a great way to introduce foliage and color to public spaces. Visit our website for the best selection of round, square and rectangular **planters**.

Keeping foliage green during the spring and summer months can be quite a challenge unless you incorporate a **planter irrigation system 2** into your foliage program. A drip or manual planter irrigation system will keep your foliage green, reduce the labor cost associated with watering and reduce the amount of water used to keep those plants green.

Provide us with your planter's shape, (rectangular, round, square or tapered) and interior top, bottom and height dimensions and we'll provide you with some irrigation options to review.

Vines and trailing plants take years to climb a grid system. Create a beautiful green wall this spring with the **VGM Greenwall System 3**. The VGM Greenwall system can beautify an ugly blank wall within 60 days or less. Send us a plan of your wall and we'll send you a list of VGM components.

Since we're talking about planters, we have 32 **St. Charles fiberglass planters 4** in need of a home now. They're brand new and sitting in Toronto waiting to make someone very happy. The price is significantly reduced for a quick sale. (36" x 24" x 24", light grey) Call 303.398.7040 or email me at James@streetscapes.biz for more details!

As the days get longer and the climate rises, projects involving bicycling, sidewalk dining and picnics move to the forefront. Check out our selection of **bicycle parking** options, **bicycle shelters**, **sidewalk dining** furniture and **umbrellas**. *Hint — the side mounted umbrellas will maximize shade.*
