VIEW MORE PHOTOS OF THE LIVING WALLS.

Last month, we highlighted the VGM Living Wall. While in Atlanta a couple of weeks ago attending the CNU conference, we had the opportunity to photograph both the **VGM** (exterior) and **Terra Screen** (interior) living wall systems. The Atlanta Botanical Gardens uses the VGM Living Wall in their Outdoor Kitchen Demonstration Area and the Terra Screen Living Wall in their prized Orchid Gallery. To view more photos on our web site, click [Living Walls](#).

We have only **16 St. Charles fiberglass planters** left! They are brand new and waiting to make someone very happy. At \$350 each, they're a great bargain. 36" x 24" x 24", light grey

WHAT'S NEW

The summer season is officially in full swing. One of the most celebrated traditions of the season is sidewalk and patio dining. Everyone would agree that outdoor dining can create a challenge when the chairs and tables have been exposed to the sun for an extended period of time. We have just the solution — **Electrotherm** and **Thermosint** coating systems from the **Kettler Collection**. After extended exposure to the sun, products finished with **Electrotherm** coating system is 20% cooler than products using conventional powder coated paint. The **Thermosint** coating system keeps products approximately 50% cooler than conventional powder coated paint after extended exposure to the sun. **Electrotherm** and **Thermosint** coating is also 3x and 8x thicker than a powder coated finish. The **Electrotherm** coating systems has a three year anti-rust warranty and **Thermosint** coating systems has a five year anti-rust warranty. **Electrotherm** and **Thermosint** products are available for immediate shipment.

In Clubhouses, community centers and swimming pools, across the country, sun worshippers can now support the environmental movement in style with the **ECO Ocean Comfort** series. The **ECO Ocean Comfort** series is a complete package of tables, chairs, bar stools and loungers made of 90% post-consumer materials. This product is built to last with metal to metal connections, UV inhibitors and a 20 year warranty. The **Oceans Comfort** series has a short two to three week lead time.

Bicycling is at its peak during the summer months. Check out the following products!

The **Meter Hitch** is a brilliant idea that converts parking meters into a bicycle racks. Simply remove the meter head, slide the meter hitch over the meter pole, then replace the meter head. You've now maximized your bicycle parking.

The **Swerve** is great for both bicycles and scooters and is available as individual or multiple connected units mounted to a rail system.

Speaking of bicycle parking, many urban development authorities, neighborhood retail districts and transportation agencies have begun to look more seriously at **bicycle shelters** and **bicycle parking stations**. Here's a specification illustration for one of our bicycle shelter/parking stations. *Have you designed a bicycle shelter or parking station and need budget numbers?*

Call us, we can help you with pricing and fabrication costs.
