LEED PRODUCT OF THE MONTH

Conceptual Site Furnishings, Inc. believes the environment is a precious gift for all to enjoy, and we share the responsibility in protecting and preserving it for the enjoyment of generations to come.

Recor™ is a novel and innovative recycled material that is unique to Conceptual Site Furnishings. Utilizing solid surface by-products as filler, this acrylic based material helps to divert reusable materials away from landfills and into the recycling stream. Recor™ functions beautifully indoors and out, and is yet another example of our commitment to promoting sustainability. We are committed to making Conceptual Site Furnishings, Inc. a good neighbor in the community, locally and globally. The environmental choices we make today — large and small — greatly impact our planet of tomorrow. Help us preserve this precious gift for the sake of our children, and their children's children.

WHAT'S NEW

Bollards are a staple of public spaces. They guide pedestrians, create boundaries and limit access to bike paths and pedestrian trails. Bollards protect retail store fronts, building entrances, light poles, curb corners and things that get run into a lot by cars and trucks. They are available in a variety of shapes and size. The range of installations include in-ground, surface mount, retractable and in some instances flip or fold.

HAPPENINGS

Feb 24 Sixth Annual Property Management Conference
 Denver Athletic Club, Grand Ballroom, Denver, CO

March 1-4 National Main Street Conference Chicago, IL

March 29-April 1 ICSC Fusion Hollywood, FL

UNDER CONSTRUCTION

Back in December, we announced that in January we would be introducing some new Streetscapes website features. Some of you have probably noticed that those improvements aren't visible yet. Like many construction projects, our website renovations are behind schedule, but our web "foreman" is telling us the project will be completed soon. Stay tuned.
