

Unique Architectural Styling

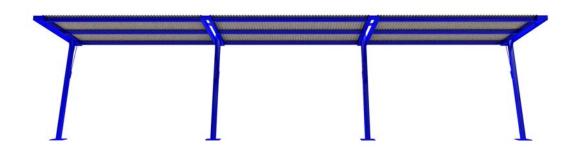

The Vizor® is a beautiful cantilever designed shelter that is able to accommodate most Dero bike rack systems, including vertical models. This innovative, attractive, and functional bike shelter is a perfect addition to your facility, especially for smaller spaces.

Patent D748,562

Easy to expand on

The modular design of the Vizor® Shelter allows you to expand as necessary to meet your bike parking capacity needs

Submittal Sheet

Patent D748,562

CAPACITY Varies by rack model

MATERIALS

Uprights: 4"x5/16" square tube Purlins: 4"x2"x3/16" rectangular tube

Feet: 5/8" plate

Rafter: 4"x2"x3/16" rectangular tube

Roof Panels: Type S deck, 26g galvanized steel

FINISHES

Galvanized

An after fabrication hot dipped galvanized finish is our standard option. The Vizor® Shelter roof comes galvanzied

as the standard option.

Powder Coat

Our powder coat finish assures a high level of adhesion and durability by following these steps:

1. Sandblast

2. Epoxy primer electrostatically applied

3. Final thick TGIC polyester powder coat

With Hoop Racks Capacity: 8 Bikes

With Ultra Space Savers Capacity: 8 Bikes

MOUNT OPTIONS Surface Mount

It is the responsibility of the installer to ensure that all base materials into which the shelter will be installed can support the rack and will not be damaged by any required installation procedures. See structural drawings for details.

With Campus Rack Capacity: 6 Bikes

LOAD DATA

Dead load = self weight of structure Live load = 40 psf Wind load = 90 mph exposure B Seismic load = Moderate Footing: see page 4

Anchor bolt = .75" diameter x 14.625" Simpson Torq-Cut

anchor

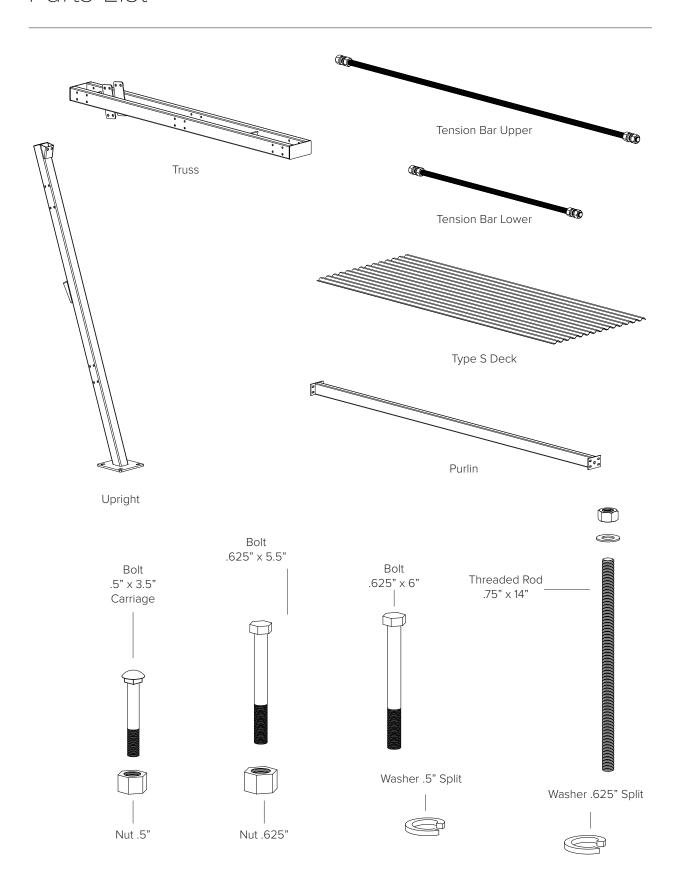

LIGHTING

Solar powered lights are available for an additional charge

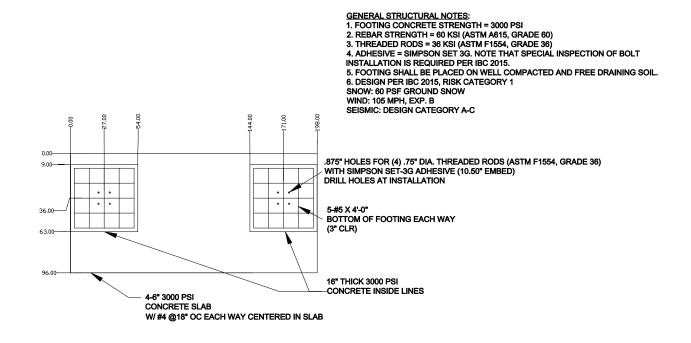

Dero Shelters can be used in a modular fashion (shared uprights) however, when used in this manner, please consult a Dero Bike Rack sales associate for layout, as the rack spacing and bike capacity can change!

Footing Details

Installation Instructions

TOOLS NEEDED

Tape Measure
Marker or chalk
Level
Sledge Hammer
Rubber Mallet
Large Hammer Drill
Standard Drill
3/8" Socket with drill attachment

7/8" Diameter Masonry Bit 5/8" Diameter Masonry Bit 3/4" Wrench/Socket 15/16" Wrench/Socket (2) 11/8" Wrench/Socket 11/4" Wrench Spud Wrench

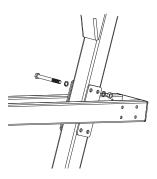

Place Uprights based on footing diagram and drill (4) 7/8" diameter holes in concrete 12" deep for each Upright. Arrange special inspection of anchor holes and anchor/epoxy installation per IBC 2012. Consult Simpson Set 3G epoxy instructions for further detail. After inspection and sufficient epoxy cure time, the Uprights may be placed over the threaded rod and secured with washers and nuts finger-tight.

2

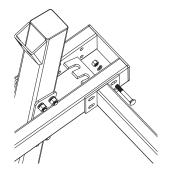

Lift Truss over the Upright and secure with (4) 5/8" x 6" bolts, (8) 5/8" lock washers, and (4) 5/8" nuts.

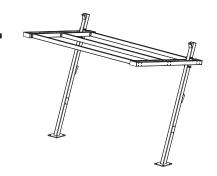

Installation Instructions

3

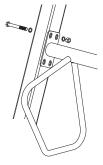

Place the first Truss and secure with (4) 1/2" \times 3.5" carriage bolts, (4) 1/2" lock washers, and (4) 1/2" nuts on both sides.

4

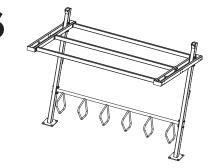

Continue securing the remaining Purlins. Leave nuts finger-tight if a Campus Rack will be added. Tighten if no Campus Rack will be added.

5

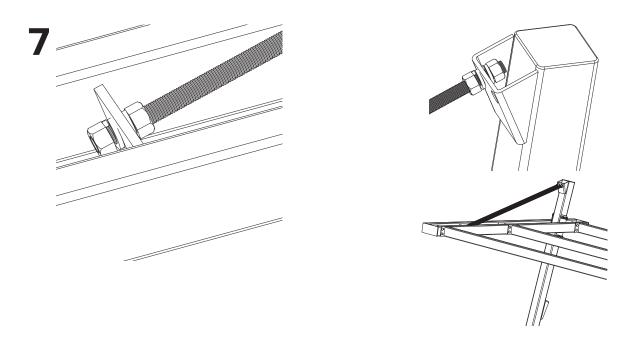

If using a Campus Rack, secure with (4) $5/8" \times 5.5"$ bolts, (8) 5/8" lock washers, and (4) 5/8" nuts on both sides.

6

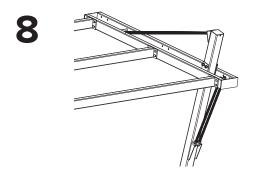

Completely tighten truss bolts and Campus Rack bolts if applicable. Completely tighten anchors to 240 ft-lbs.

Installation Instructions

Secure the upper Tension Bars with (4) 3/4" nuts and (4) 3/4" lock washers each.

Secure the lower Tension Bars with (4) 3/4" nuts and (4) 3/4" lock washers each.

Installation Instructions

9

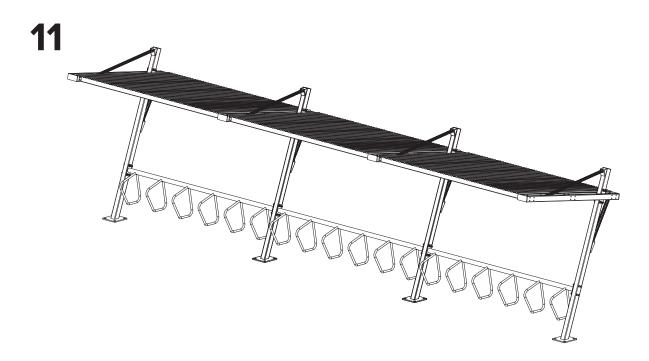

Place the first section of Type S Deck and secure with (6) self-drilling screws.

10

Place the next section of Type S Deck and secure with (6) self-drilling screws. The first (3) self-drilling screws will go through both Type S Deck sections.

Continue securing the remaining (3) Type S Deck sections.

If building a modular run of shelters, continue adding shelters until complete.
